

Appl. No.: 10/538,941
Filed: June 13, 2005
Amdt. dated 04/26/2006

Amendments to the Specification:

Replace the paragraph beginning on page 11, line 32 and ending on page 12, line 13 with the following paragraph:

The at least two nucleic acid isoforms may be obtained from at least one nucleic acid library, biological sample, cell, tissue, organ or biopsy. The isoforms can also be prepared from two or more different nucleic acid libraries, biological samples, cells, tissues, organs or biopsies. The isoforms can be obtained for example from a standard sample and from one or more test sample, as indicated in US 6,251,590 B1, herein incorporated by reference. The test or standard sample can be for example a nucleic acid library, biological sample, cell, tissue, organ or biopsy. The test sample can be preferably a tumoral source, treated cell, and/or from cell undergoing apoptosis or other sources under physiological or pathological conditions as indicated in US 6,252,590 6,251,590.
